The mentioned substance feature on the present version of the [European Chemical Agency REACH Candidate List](#). According to EU regulations (article 33, 1907 / 2006 REACH) we are obliged to inform if such a substance might be present, even in very low levels.

There is no safety risk, and people will not be exposed to the substance under normal conditions.

No other of our products than those mentioned above contain any substances included on the current REACH Candidate list in amounts exceeding 0,1% (by weight).

Protect the environment by not disposing of batteries or products containing batteries with your household waste. Check with your local authority for recycling advice and facilities.

More info about product safety can be found on [Sustainability | Toys made with care | Micki \(mickiofsweden.com\)](#)
